

Race Gear Guide

Build your racer's complete season setup — sized to their age and weight — in about five minutes, from your phone.

- 01 Set up
- 02 Pick gear
- 03 Sign in
- 04 Share it

WHAT'S INSIDE

Setting up a racer profile · reading recommendations · sizes, brands and filters · saving with your phone number · family bags · printing, sharing and online checkout · shop guides and equipment rules.

How the guide works

The Race Gear Guide is the Skiis & Biikes online race room for the season. Open the link on any phone — nothing to install. Answer three quick questions about your racer and it builds a gear list that fits, from the Skiis & Biikes' real race inventory.

- **1. Set up your racer**

Age group, weight, and years of racing — under a minute.

- **2. Browse recommendations**

Real gear that fits, best match first. Filter and add to your bag.

- **3. Save with your number**

A one-time text code keeps your bag saved for next time.

- **4. Share your bag**

Print it, text it, email it, or check out online.

THE MENU

Four buttons across the top are always available: Setup restarts the questions, Bag opens your saved list (the red number is how many items are in it), and Guides and Rules are reference pages from your AOA. The four lights in the header show where you are in the flow.

Everything saves as you go on your phone. Nothing is purchased and no payment details are ever asked for — the bag is a fitting list, not an order.

STEP 1

Set up your racer

Three dials, one screen. The guide only needs enough to size gear correctly.

- 1 Age group — tap your racer's division (U8 to U16). Each key shows the ages it covers, and the app tunes weight ranges per group.
- 2 Weight — type it into the display or drag the slider, in pounds or kilograms. The green In range light means the weight is typical for that age group — out of range is fine too; recommendations simply follow the number you enter.
- 3 Experience (optional) — flip the switch to I for a first-year racer or II for a returning one. It doesn't change the gear list; it gives S&B context.
- 4 Tap see recommendations. The button repeats your setup — here U14, 105 lb, first year — so you can double-check before continuing.

U14 • 105 LB • FIRST YEAR

Tip: outgrowing gear mid-season is the #1 fitting mistake — if your racer is between sizes, keep the honest weight and watch for the guide's Size-up hints.

STEP 2

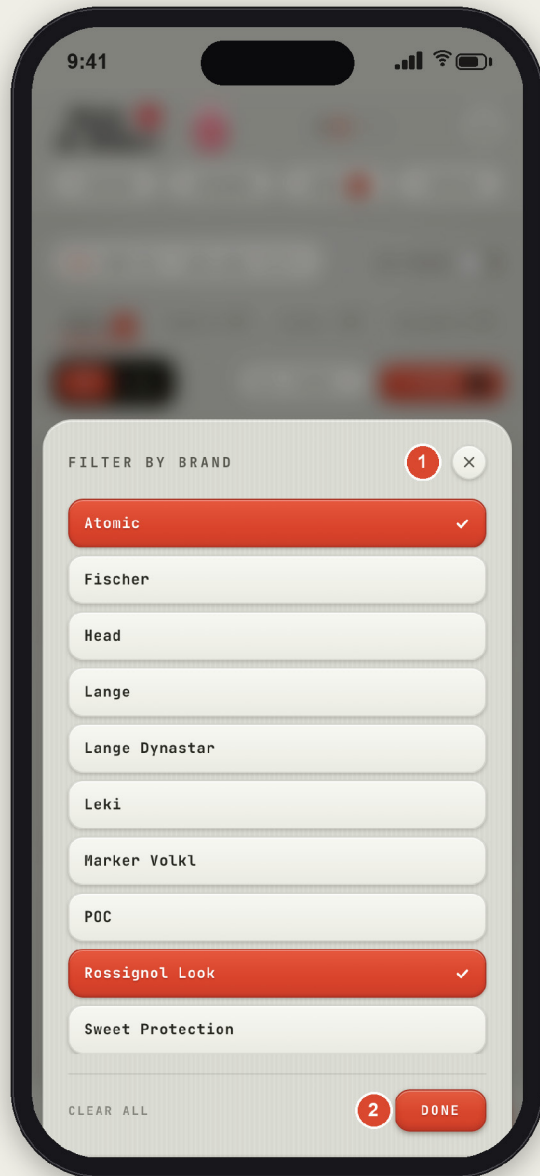

Browse what fits

Every item shown fits the profile you entered, ordered best-fit first.

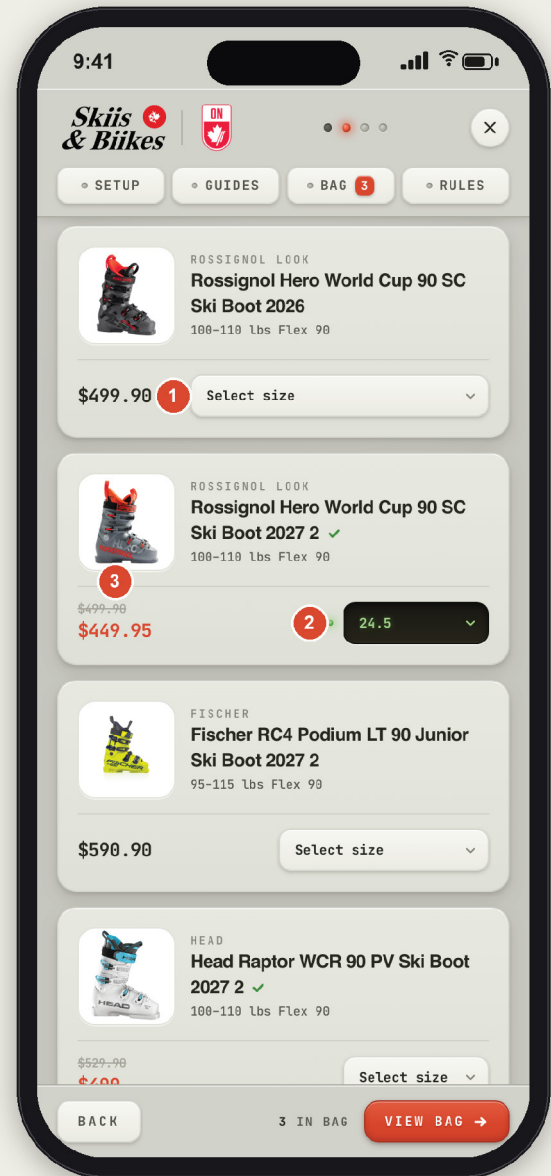

- 1 Your racer chip — tap Edit to change age or weight anytime; the list refreshes instantly.
- 2 In stock — switch on to see only gear at S&B today; off shows the full catalog (special-order items are tagged Catalog).
- 3 Equipment tabs — Skis, Boots, Bindings, Helmets, Poles. The number is how many options fit your racer.
- 4 Discipline — GS or SL (and Combi where offered). Skis differ by event; boots and bindings don't, so those tabs skip the switch.
- 5 Model year — limit the list to a single season.
- 6 Brand — pick favourite brands; the filter follows you across every tab.
- 7 + BAG adds an item (it flips to a green 3 IN BAG — tap again to remove). The bottom bar counts your bag and View bag moves you on.

Brands, sizes & stock

Brand filter

- 1 Tap any number of brands — great for matching bindings to your ski brand.
- 2 Done applies the filter everywhere; Clear all resets it.

Size dropdowns

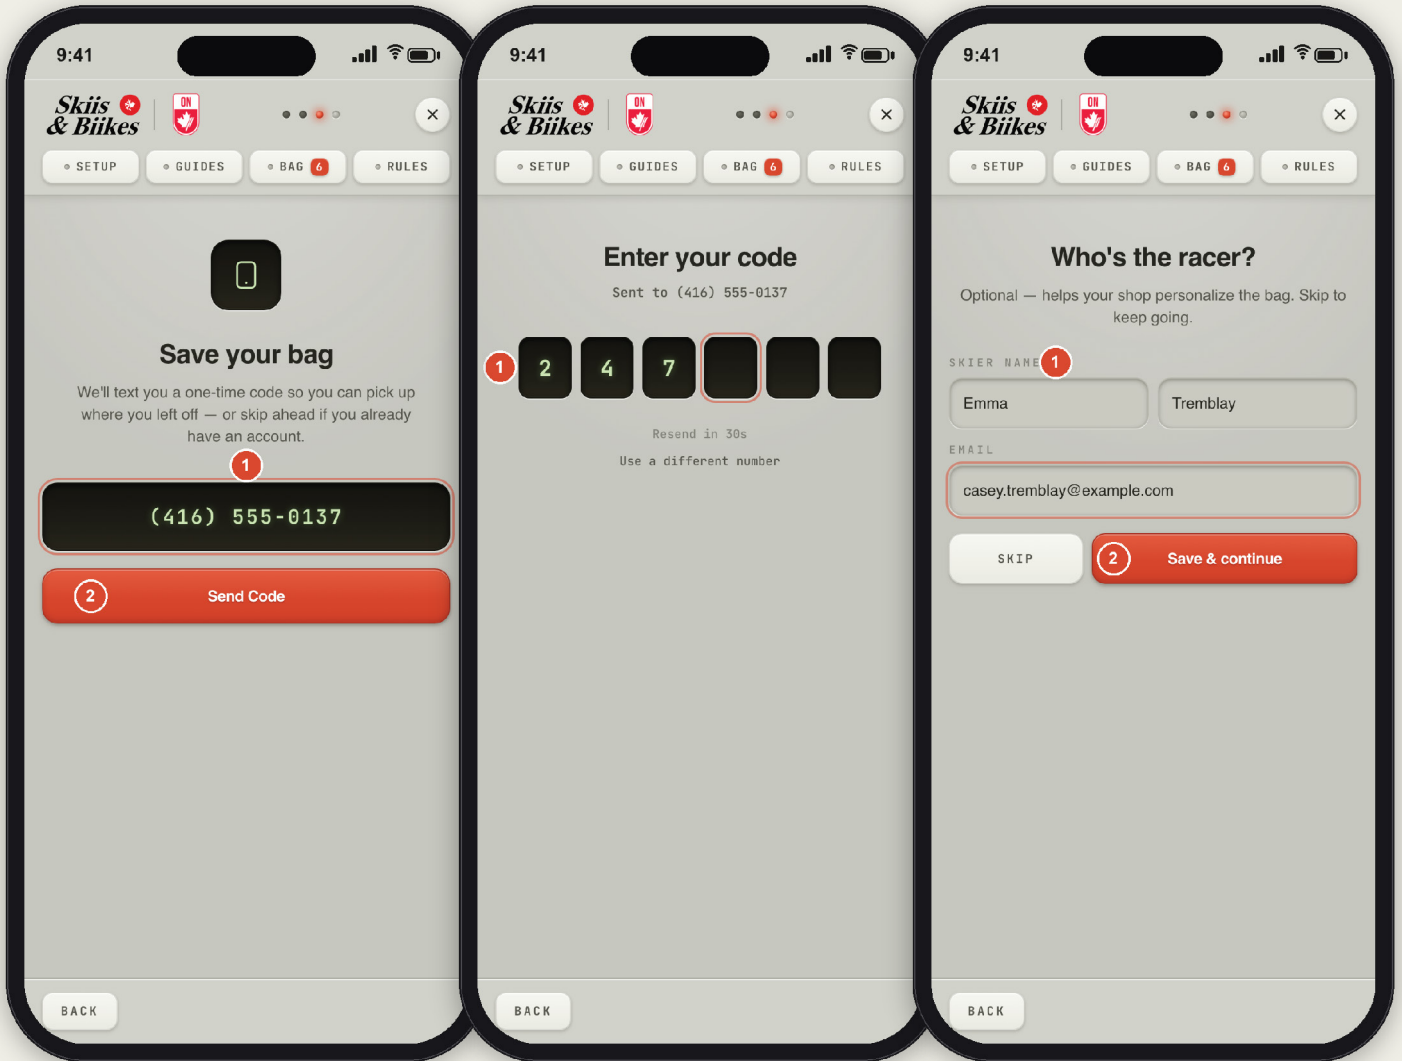

- 1 Boots, bindings and helmets list every size in one card — sizes are flagged “Best fit” or “Out of stock”.
- 2 Picking a size adds it to your bag (the display turns green). Picking another size later swaps it — one size per model.
- 3 A struck-through price means the Racer Price.

Watch for the amber Size-up tag on ski cards: your racer is near the top of that size's weight range, so consider the next length if they're still growing.

STEP 3

Save your list

First time only — one text message keeps your bag attached to your phone number.

1 • Your number

Tap View bag, enter your mobile number and hit Send Code.

2 • The code

Type the 6-digit code we text you — it verifies on its own.

3 • The racer

New here? Add the racer's name and your email — or Skip.

GOOD TO KNOW

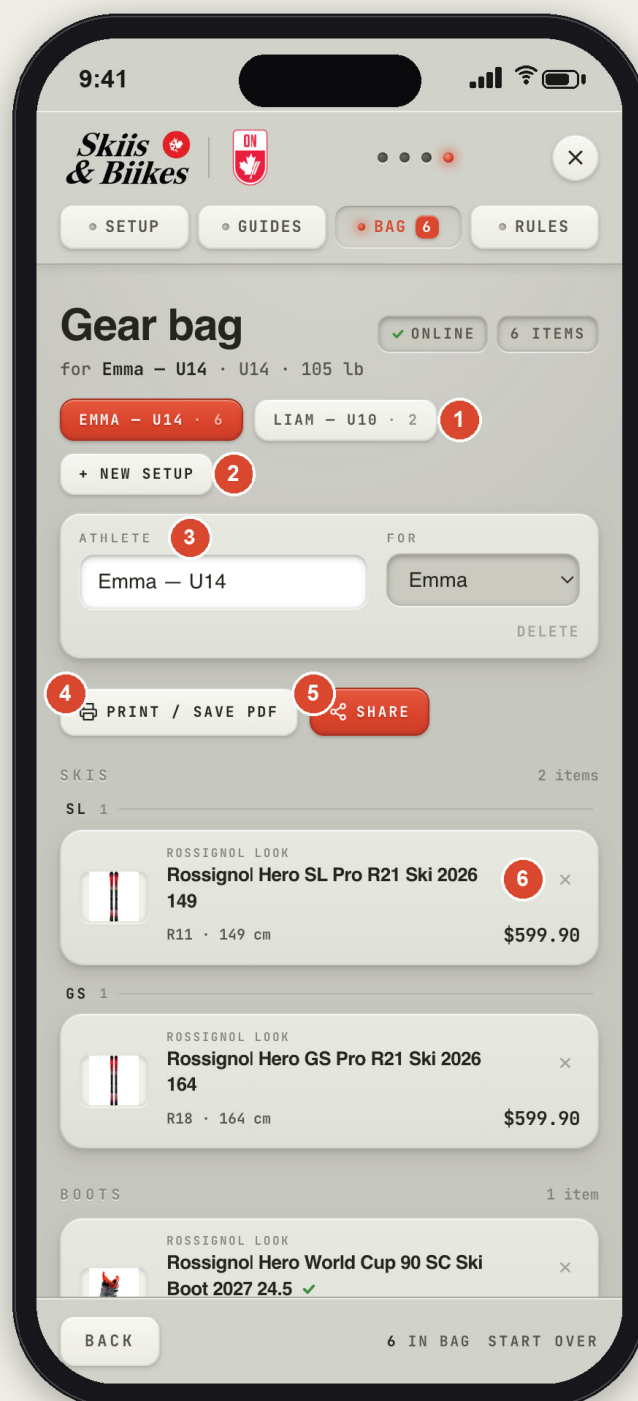

You stay signed in on your device for about a month of use, so next visit jumps straight to your bag. Anyone in your family who verifies the same number sees the same saved bags.

STEP 4

Your gear bag

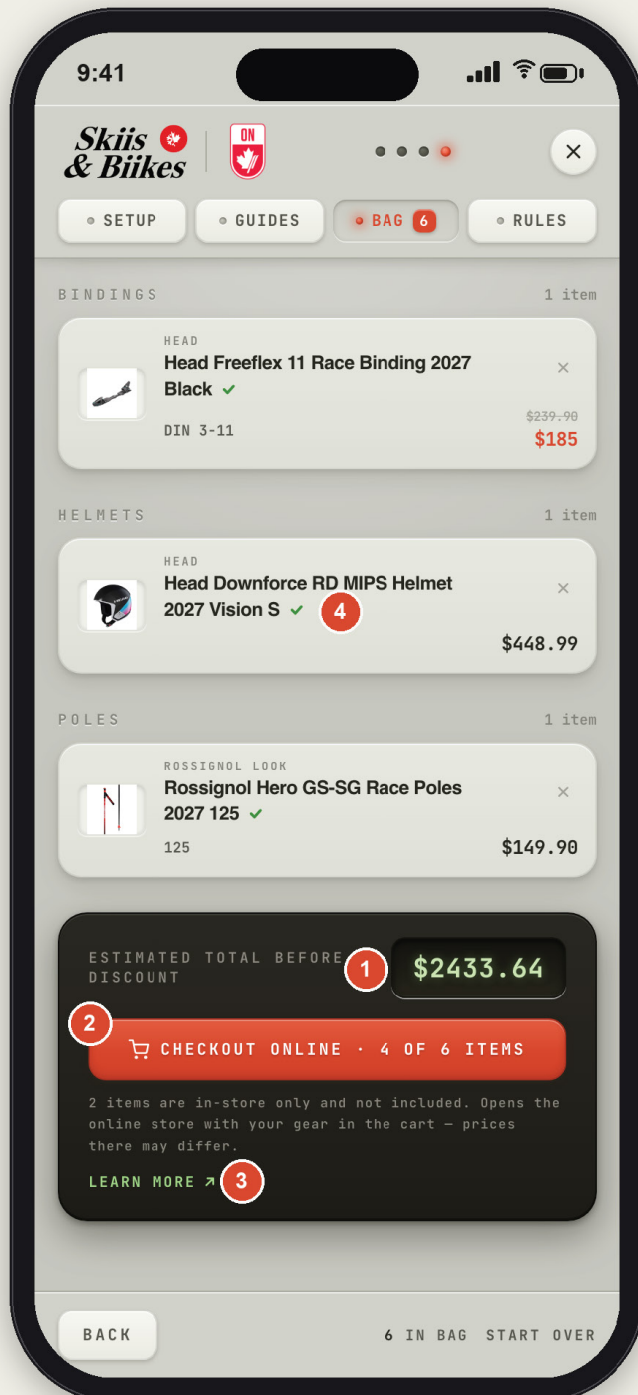

The saved list — organized by equipment type, with skis grouped by SL / GS.

- 1 One chip per athlete — tap to switch between saved setups.
- 2 + New setup starts a fresh bag with its own age and weight — perfect for a sibling.
- 3 Name the setup and, if your family has multiple members, choose who it's For. Delete removes a setup you no longer need.
- 4 Print / Save PDF makes a clean, sheet to bring to your fitting.
- 5 Share sends the list anywhere — next page.
- 6 Remove any item with the x; the totals update instantly.

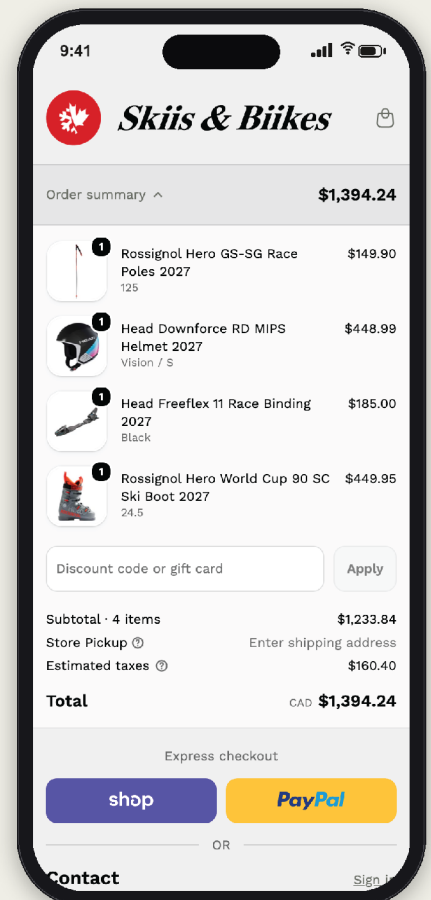

S&B can pull up this exact bag on their side, so your fitting starts with everything already picked out.

Totals & online checkout

- 1 Estimated total before discount — the sum of everything in the bag, before additional club or program pricing Skiis & Biikes applies.
- 2 Checkout online — one tap opens the S&B web store with the online-sold items already in the cart. “4 of 6 items” means two things stay on your list for the store visit.
- 3 Learn more — your S&B race program page.
- 4 The green 3 marks gear that's also sold online; unmarked items are bought in-store or special-ordered.
- 5 Pay now happens in the S&B own online checkout — your sizes arrive in the cart, store pickup and discount codes are handled there, and prices may differ from in-store. The gear guide itself never takes payment.

Print / Save PDF — what you get

Tap Print / Save PDF on the bag and your phone's print sheet opens — print it, or pinch out / choose Save to Files to keep it as a PDF.

Sharing, Guides & Rules

Share gear list

Share via... opens your iPhone share sheet (Messages, AirDrop). Or email the list, copy it as text, or copy a link that rebuilds this exact bag for whoever opens it.

Guides tab

- 1 Filter the Brand's posted documents by season.
- 2 Tap a row — brand race guides and size charts open in a new tab.

Rules tab

- 1 Opens pre-filtered to your racer's age group.
- 2 Chips run from Mandatory to Not Permitted for each equipment type — straight from AOA.

QUICK TIPS

Before your fitting

- **Edit anytime**

Tap the racer chip on the recommendations screen to change age or weight — the list refreshes instantly.

- **“Inquire” pricing**

No price shown just means ask the shop — usually special-order or program-priced gear.

- **Switching phones?**

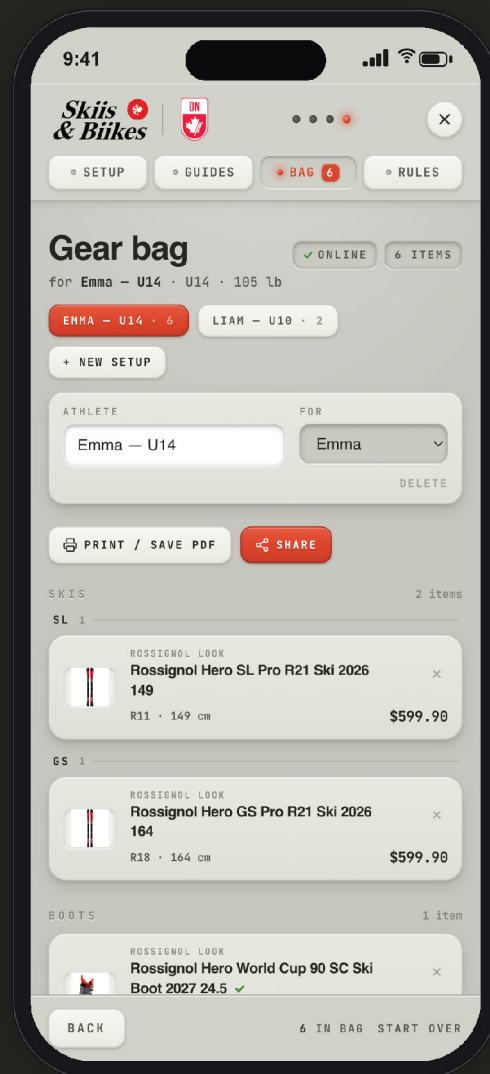

Copy the shareable link and open it on the new device — it rebuilds your bag exactly.

- **Bring nothing**

Your S&B store can open your saved bag at the counter. The printout is handy, not required.

- **About prices**

Totals are estimates before club or program discounts, and online store prices may differ from in-store.

READY TO RACE.

Questions about fit, sizing, or your program's rules? The S&B race desk is the fastest answer — this guide just gets you to the start line prepared.
